Chief, FDM

Chief of Station, Karlsruhe

Redbox/Operational

\*Summary Report on Carriage Test of M. A. GIORDANO on 29 October 1951

1. Object of Test: Assessment
2. Procedure: Standard.
3. Anticipated Reliability of the Test Results: Subject was moderately and consistently responsive, and it is estimated the results may be classified as "reliable" in the scale of "reliable", "fairly reliable", and "unreliable".
4. Summary of the Test Results: Subject appears to be the person he claims to be and not to be either an enemy agent or an habitual criminal. Subject appears not to be controlled by any other IS or group. Subject appears to have told the main truth about his past. Subject appears to have cooperated with the German service during the War but does not appear to have maintained active working relations with it since then, although he does still occasionally associate with his old chief. Subject appears to associated the year 1940 with events he would rather not tell us about, although serious deception about these events does not appear indicated.
5. Carriage Officer's Appraisal of Subject: A stable, intelligent personality who has not broken down under his share of hard knocks. Appears tough, durable, and able to control himself.
6. Remarks & Recommendations: Should get a control re-run in 18 months or so. Subject shows considerable powers of auto-suggestion, and this point should be kept in mind when preparing future tests for him.

\*Detailed report passed to Case Officer on 30 October 1951.
